

Hackathon @Karierijada - "Career olympics" (part of NEKSTEP project)

OBJECTIVE "Hackathon" was a part of the Karierijada event where groups of young people tried solving challenges local employers encountered in their everyday work, giving youth direct contact with local employers.

KEY COMPONENTS OF THE PRACTICE

- 1) We invited **three local companies** to share the challenges they encounter in their daily operations.
- 2) **Students were introduced to these real-world challenges** and organized into groups to brainstorm and develop potential solutions.
- 3) Each student group prepared a **presentation detailing their solution ideas**, which they then presented to the companies, explaining their approaches and insights.

Ljudska univerza Koper - Adult Education Centre Koper

Duration: 2023

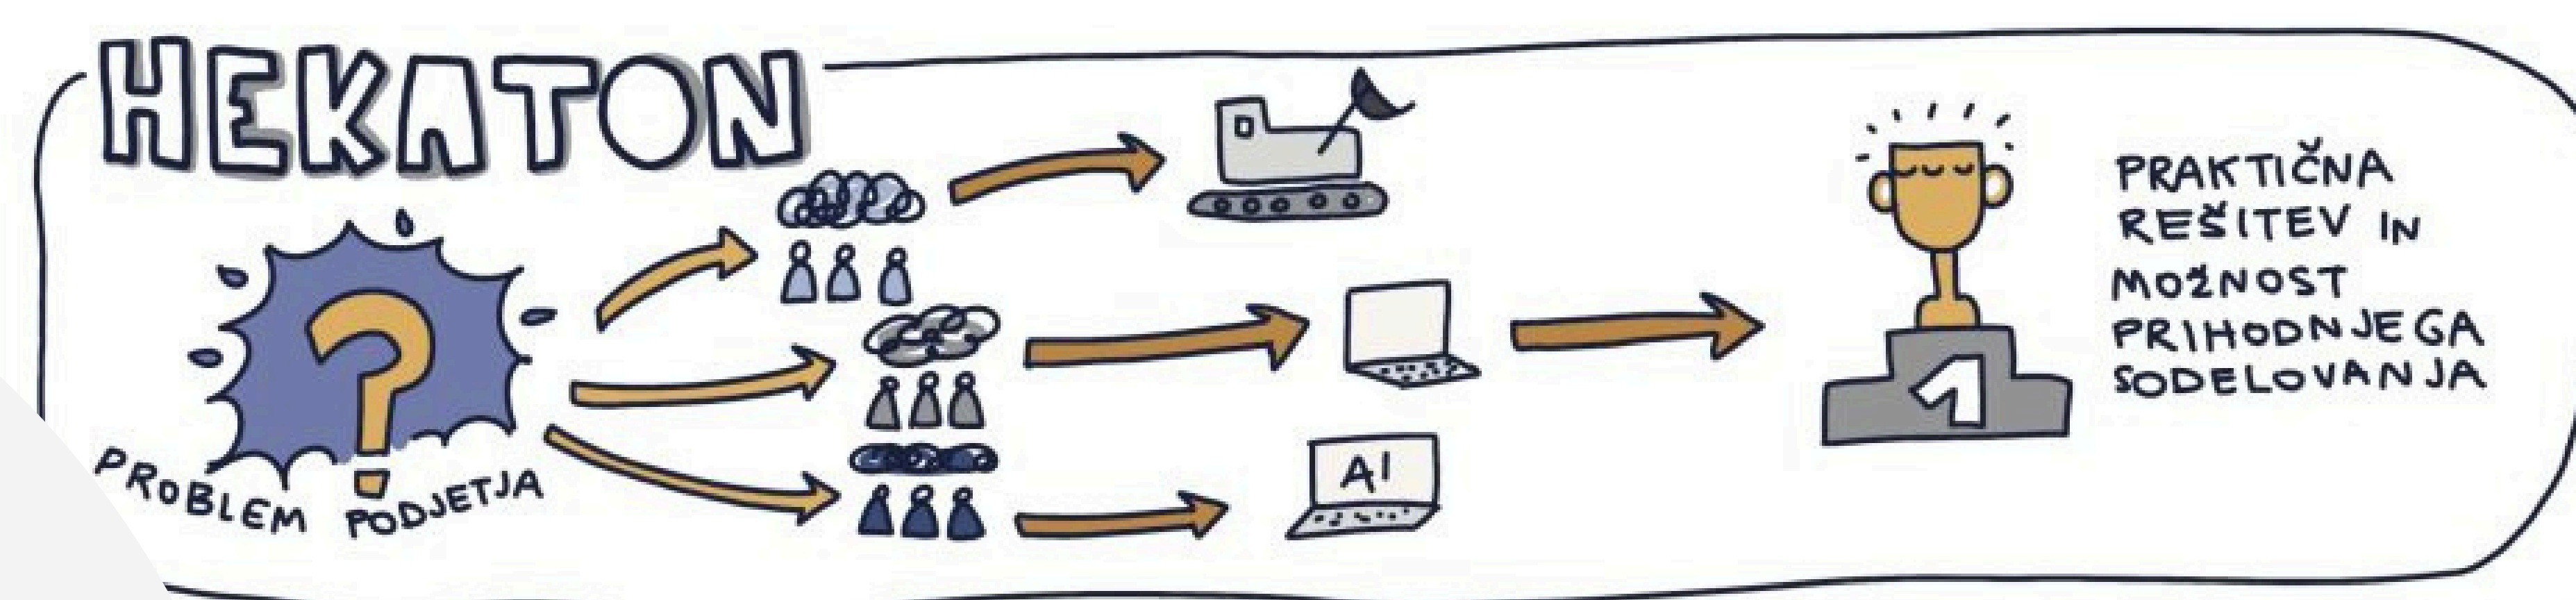

Target group: Young adults from less dynamic environments (14 - 29)

KEY OUTCOMES

- Participants were **directly in active contact with local employers**
- Young people were able to **test themselves in business environments**
- The winning group offered a solution for the **digitalisation of construction processes** for a building company. The other two groups proposed solutions for promotional activities for the other two participating companies.

EVIDENCE OF SUCCESS

- The construction company implemented a part of the solution, offered by the students and invited them to participate in other projects.
